

## Sound pillow device

# ECHO

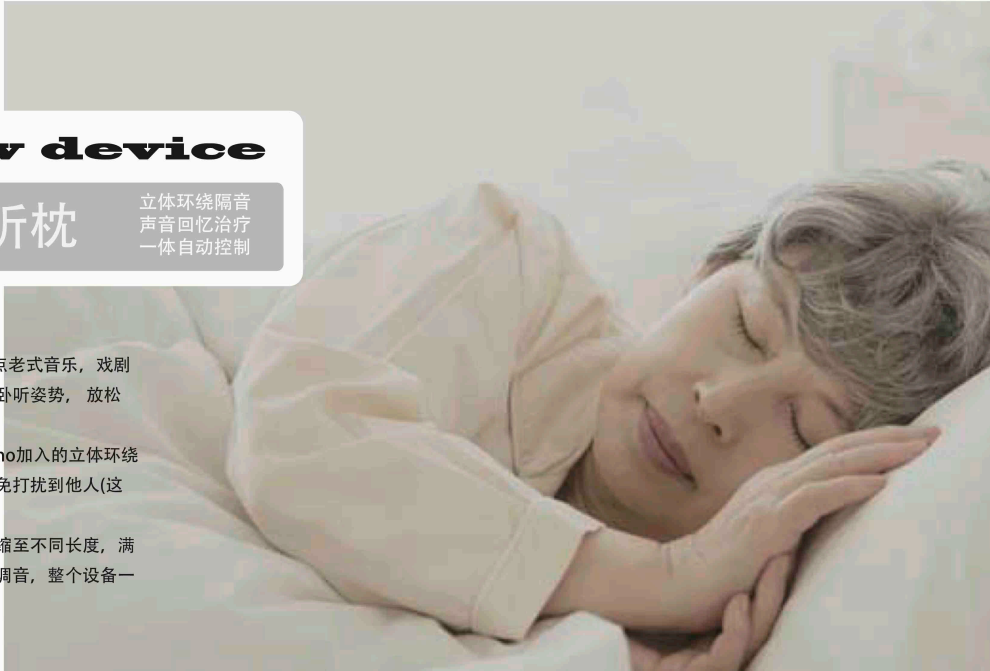

## 声音听枕

立体环绕隔音  
声音回忆治疗  
一体自动控制

**设计说明：**Echo收录了有年代记忆点老式音乐，戏剧以及在家难以听到的大自然声音等等，配合卧听姿势，放松的同时可追忆往昔；

声音往往比图像更能使老人安定地休息，Echo加入的立体环绕与隔音装置，可以让老人在聆听的同时，避免打扰到他人(这一功能也适用于养老院)；

两翼为可调节角度的音响装置，底板可伸缩至不同长度，满足不同尺寸的枕头，按钮设置在两翼，滑动调音，整个设备一体式，便于操作；

记忆唤醒  
怀旧乐曲，回忆往昔

环绕隔音  
静心聆听，免扰他人

一体化可调  
无线操作，轻松可调

### Keywords

Memory recall Stereo surround All-in-one design

### Design descriptio

Echo's music library contains classic songs, traditional opera melodies, natural sounds, etc. The usage of Echo is attaching itself to a pillow. The user can lie down comfortably then listen music and relax. This pleasant environment conduces the elderly to reminisce their old days.

Sound, compares to visual image, is usually more relaxing for the elderly. Echo's stereo surround and soundproof design avoid disturbing family or roommates (in case they live in elderly home) when listening to radio

Echo consists of two "ears" and a baseboard. The ears are actually an audio system and can be adjusted to different angles manually. The baseboard under the pillow is telescopic which is able to satisfy various sizes of pillows. Buttons and a sliding volume regulator, is set to the right ear. All-in-one design makes Echo accessible, convenient and different.
